

## What's On In Landbeach - October 2018

After a variable August - a very hot start followed by cooler, damper weather - we have had a pleasant, but dry, September. The end of the month has been particularly enjoyable, with warm sunny days, although nippy nights, getting near to a ground frost. My holly tree is covered with glowing red berries.

Some birds have now gone until next year - I saw my last swallow at Willingham on 20<sup>th</sup> Sept, and I will miss their friendly company. But, in compensation, other birds are starting to return to our gardens. Today I saw my first chaffinch in a long while. At the weekend I saw THREE white egrets standing in the Waterbeach Rd field - looking rather miserable, it must be said!

Bit rough about the virtual loss of our bus service, isn't it? As the Parish Council say, it is the Cambridgeshire & Peterborough Combined Authority we need to complain to. So how do we do that? Perhaps a major shift in transport strategy is needed, but hopefully not a return to the mode of transport depicted below.

Who knows where this Shetland Pony Rampant is? At bottom left you can see a rather more placid real pony and its real shadow.

Items for Nov are needed by Sat 20<sup>th</sup> Oct, please. Barbara Le Gallez, 113 Waterbeach Rd, 01223 860283, [blegallez@yahoo.co.uk](mailto:blegallez@yahoo.co.uk).

### **Friends of Worts Meadow Pond Update**

As the lyrics say: "If you go down to the woods today, you're sure of a big surprise" - but hopefully it will be a good one.

**Froglife (the national charity for the conservation of amphibians and reptiles) has constructed us a new pond** adjacent to the other two small ponds between Worts Meadow and Bourne Wood. The area had become completely overgrown by scrub, which has now been cleared. The other two ponds, both of which dried out this summer, are also being renovated.

The aim is to make a better and more attractive habitat for our **Great Crested Newts** as well as other amphibians and waterlife. It will look pretty messy for a few months but will quickly recover and the newts will undoubtedly be back in the ponds next year in early spring. Ultimately the area should provide all of us with a place to watch and enjoy our local wildlife as well as helping to conserve ever dwindling populations of amphibians. FOWM will help to maintain the site and develop easier access. If you have any questions or comments do please let me, Frances Dipper, know on [frances.dipper@sustenergy.co.uk](mailto:frances.dipper@sustenergy.co.uk).
